February, 2012

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi
Director of Census and Statistics

- **Selected Socio-Economic Indicators**

INFLATION

February Inflation Rate reduces to 6.0 percent

The annual rate of inflation derived from the revised all items Consumer Price Index (CPI) reduced to 6.0 percent in February 2012, from 6.4 percent in

January 2012. The reduction is mainly attributed to reductions in prices of food and non alcoholic beverages.

Changes in Annual Inflation Rates for CPI Main Groups

The revised CPI is categorised into 12 main groups. Between January 2012 and February 2012, the annual rate of inflation for Food and non-alcoholic beverages; Housing, water and electricity; Transport, Miscellaneous goods and services reduced. The annual rate of inflation for

Alcoholic beverages and tobacco; Clothing and footwear; Furnishing and household equipment; Health; Communication; Recreation and culture; Education; and restaurant and hotels increased.

Twelve Month Inflation Rates: Division level (2009 = 100)

Period	All items	Food & non-alcoholic beverages	Alcoholic beverages & tobacco	Clothing and footwear	Housing, water, electricity, Gas, other fuels	Furnishings and household equipment	Health	Transp	Communication	Recreation and culture	Education	Restaurants and hotel	Miscellaneous good & services
Jan12-Jan 11	6.4	6.1	4.3	7.3	8.4	2.3	6.7	12.3	0.0	7.2	10.7	4.7	3.3

Contributions of different items to Overall Inflation

Of the total 6.0 percent annual inflation rate in February 2011, food products accounted for 2.9 percentage points,

while non-food products in the CPI accounted for 3.1 percentage points.

Percentage Points Contributions of different items to Overall Inflation

Items	January 2012	February 2012
Food and Non-alcoholic beverages	3.2	2.9
Alcoholic beverages and Tobacco	0.1	0.1
Clothing and footwear	0.5	0.6
Housing, Water, Electricity, Gas and Other fuels	1.1	0.9
Furnishings and Household Equipment	0.2	0.3
Health	0.1	0.1
Transport	0.6	0.5
Communication	0.0	0.0
Recreation and Culture	0.1	0.1
Education	0.3	0.3
Restaurant and Hotel	0.0	0.0
Miscellaneous Goods and Services	0.2	0.1
All items	6.4	6.0

National Average Prices of Selected Products

A comparison of retail prices between January 2012 and February 2012, shows that the average price of a 25 kg bag of white breakfast mealie meal reduced by 2.1 percent, from K43,747 to K42,821, while the national average price of a 20 litre tin of maize grain reduced by 3.6 percent, from K19,428 to K18,732. The national average price of 1kg of pumpkin leaves (vegetable) reduced by 6.3 percent, from K3,093 to K2,897.

However, the national average price of 1kg of dried kapenta (Siavonga) increased by 5.6 percent, from K63,503 to

K67,032. The national average price of 1kg of tomatoes increased by 6.9 percent, from K4,165 to K4,453, while the national average price of 1kg of dried beans increased by 3.0 percent, from K11,029 to K11,364.

Domestic air fares increased by 3.8 percent from K899,600 in January 2012 to K934,200 in February 2012 while the international airfare between Lusaka and London reduced by 17.2 percent from K6,434,200 in January 2012 to K5,324,400 in February 2012.

Background on the Revised Consumer Price Index in Zambia

The Central Statistical Office (CSO) has revised the Consumer Price Index (CPI) based on a new methodology including the revised basket of products, new weights, new index reference period and new software for processing the CPI.

The International Labour Organization (ILO) technical assistance Mission in May 2006 and the International Monetary Fund (IMF) technical assistance Mission conducted in 2009 assisted in the development of the new methodology for computing the CPI.

A second ILO technical assistance Mission was requested from ILO in September 2011. The Mission was funded by the African Development Bank (AfDB), and the main objective of this Mission was to review and validate the new Consumer Price Index (CPI) methodology, including data entry and processing software, before it is formally launched. An independent assessment from the ILO was required because its Mission had conducted a technical assistance Mission in May 2006 and had made some recommendations on the most appropriate methods for rebasing the index and selecting a new index among other things. In addition, the Mission was to provide additional guidelines on the treatment of the new elements in CPI design, on the basis of international standards and best national practices.

Following a recommendation by the Ministry of Finance and National Planning, a technical committee on the new CPI was formed. Membership of the technical committee was drawn from the following; Bank of Zambia, COMESA, Economics Association of Zambia (EAZ), Zambia Institute for Policy Analysis and Research (ZIPAR) the University of Zambia, the Jesuit Centre for Theological Reflection (JCTR), Ministry of Finance and National Planning, Central Statistical office. Further, the following three subcommittees were formed:

- (i) *Methodology sub-committee to review and validate the new CPI methodology,*
- (ii) *Policy sub-committee to deal with policy implications of the new CPI results (i.e. the new CPI produces lower inflation rates)*
- (iii) *Sensitization sub-committee, with the responsibility of sensitization of stakeholders on the new CPI.*

New CPI Methodology

Key features of the revised CPI include the following:

- *A revised basket of goods and services from 357 to 438 (additional 81 new items)*
- *A new system of classification in accordance with international guidelines, namely Classification of Individual Consumption by Purpose (COICOP) (from 8 to 12 divisions)*
- *New expenditure weights from the 2002/2003 Living Conditions Monitoring Survey (LCMS)*
- *A new index reference period, from 1994 to 2009*
- *Use of Geometric Mean as opposed to Arithmetic Mean for calculating elementary level indices*
- *Additional number of districts and outlets*
- *New computer system for data entry and data processing*

The differences between the Old and the Revised CPI methodologies are summarized below.

Comparison of the Old and New Consumer Price Index

Item/ Area	Old CPI	Revised CPI
Basket of products	357	438
Classification system	8 Divisions	12 Divisions (COICOP)
Weights	Derived from 1993/1994 Household Budget Survey (HBS)	Derived from 2002/2003 LCMS III HBS TYPE
Compilation level	Metropolitan Low Income Group, Metropolitan High Income Group, and Non-Metropolitan Group.	Provincial CPIs
Index reference period (Base Period)	1994	2009
Methodology for calculating item indices	Arithmetic mean	Geometric mean
Price reference period	Base price reference period	Previous month price
Districts	45	All districts in Zambia
Outlets	2115	About 3,000
Software for Data Entry, Processing and Reporting	Dbase IV, DOS based	Microsoft Access, with Visual Basic for Applications (Windows based)

Features of the Revised CPI Software

The New CPI System has been developed in Access with the following features: -

- ✦ *Uses Windows platform*
- ✦ *Propagates centrally collected prices to provincial outlets*
- ✦ *Validation is immediate, which allows immediate correction*
- ✦ *Editing/ reviewing of quotations is flexible – permitting filtering of records of interest such as the threshold (upper and lower limits) values of price change rates*
- ✦ *Prints Questionnaires from the application*
- ✦ *System works in a Client-Server environment, supporting a minimum of 15 users concurrently*
- ✦ *System is secure (implements log-on and roles)*

Phased implementation of the new CPI

- *The revised CPI is currently being published at national level.*
- *In addition, provincial level indices and rates of inflation will be published in the second quarter (April 2012)*
- *Further, divisional level indices and rates of inflation will be published in the fourth quarter (November 2012).*

INTERNATIONAL MERCHANDISE TRADE

January 2012 records Trade Surplus

Zambia recorded a trade surplus valued at K269.3 Billion in January 2012, compared to K475.9 Billion recorded in December 2011. This means that the country exported more in January 2012 than it imported, in the same month, in nominal terms.

Since January 2011 the country has had monthly trade surpluses with the highest valued at K1,484.5 Billion recorded in

January 2011, followed by K1,272.5 Billion in September 2011 and the lowest in October 2011, valued at K154.4 Billion.

A comparison between January 2011 and January 2012 indicates a drastic decline of 81.9 percent in the trade surplus from K1,484.5 Billion in January 2011 to K269.3 Billion in January 2012.

Exports by Major Product Categories, January 2012 and December 2011

Zambia's major export products in January 2012 were from the Intermediate goods category (*mainly comprising copper cathodes and sections of refined copper*) accounting for about 70.1 percent. Other exports were from the Consumer goods; Raw materials; and Capital goods categories; which collectively accounted for about 29.9

percent of total exports in January 2012. This implies that between January 2012 and December 2011, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, accounting for an average of 75.1 percent of the total exports for the two months.

Exports by Major Product Categories January 2012 and December 2011

Zambia's Metal Exports and Non-Traditional Exports (NTEs) January 2012 and December 2011

There has been an increase in the total value of exports from K3,560.8 Billion to K4,257.6 Billion between December 2011 and January 2012. The overall contribution of metals and their products to the total export earnings in January

2012 and December 2011 averaged about 71.5 percent. The share of NTEs recorded an average of about 28.5 percent in revenue earnings between January 2012 and December 2011.

Zambia's Major Export Destinations by Commodity in January 2012

Zambia's major export destination in January 2012 was Switzerland, which accounted for 30.3 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for about 90.7 percent.

Zimbabwe was the second major destination of Zambia's exports accounting for 18.8 percent. The main export product to Zimbabwe was Maize seed (79.6 percent).

China was the third major export destination accounting for 17.3 percent. The main export product to China was Copper Blister, which contributed 88.7 percent to the country's total exports.

South Africa was the fourth major destination of Zambia's exports accounting for 5.6 percent. The major export product to South Africa was Semi-manufactured gold (incl. gold plated with platinum), which accounted for 22.1 percent.

The fifth major export destination, was the United Kingdom, accounting for 5.0 percent. The main export products to the United Kingdom were Cathodes and sections of cathodes of refined copper (62.7 percent).

These five countries collectively accounted for 85.0 percent of Zambia's total export earnings in January 2012.

Export Market Shares by Regional Groupings, January 2012 and December 2011

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's total exports, accounting for 29.3 percent in January 2012. Within SADC, Zimbabwe was the dominant market in January 2012 with 64.0 percent. Other notable markets in SADC were Congo (DR), Namibia and Malawi.

The Common Market for Eastern and Southern Africa (COMESA) was the second largest market for Zambia's total exports, accounting for 23.8 percent in January 2012. Within COMESA, Zimbabwe dominated the export market, accounting for 78.8 percent. Other markets in COMESA were Malawi, Kenya and Burundi.

Asia was the third largest market for Zambia's total exports accounting for 18.8 percent in January 2012. Within Asia, China was the dominant market with 91.9 percent in January 2012. Other notable markets in Asia were the United Arab Emirates, Singapore, Philippines and India.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 7.8 percent in January 2012. Within the EU, the United Kingdom was the dominant market with 64.8 percent. Other notable markets were Luxembourg, Belgium, Germany and the Netherlands.

Zambia's Major Import Sources by Commodity, January 2012

The major source of Zambia's imports in January 2012 was South Africa, accounting for 28.0 percent. The major import products from South Africa were Diagnostic/lab reagents, contributing 15.9 percent to total imports.

products from China were Other parts of aeroplanes or helicopters, accounting for 66.0 percent.

Other sources of Zambia's imports were Congo (DR), Kuwait and Kenya.

The second main source of Zambia's imports in January 2012 was China, accounting for 22.4 percent of the total value of imports. The major import

These five countries collectively accounted for 74.7 percent of Zambia's total imports in January 2012.

Import Market Shares by Regional Groupings, January 2012 and December 2011

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 54.3 percent in January 2012. Within SADC, South Africa was the major source of Zambia's imports with 80.9 percent in January 2012. Congo (DR) was the second major source of Zambia's imports with 12.2 percent in January 2012. Other notable markets were Zimbabwe, Tanzania, Namibia and Mauritius.

Asia was the second largest source of Zambia's imports accounting for 42.1 percent in January 2012. Within Asia, China was the dominant source of Zambia's imports with 69.0 percent in January 2012. India was second with 12.3. Other important markets were Japan, the United Arab Emirates and Hong Kong.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest source of Zambia's imports accounting for 22.6 percent in January 2012. Within COMESA, Congo (DR) was the main source of Zambia's imports, accounting for 65.1 percent, followed by Kenya with 26.4 percent. Other sources were Zimbabwe, Mauritius and Egypt.

The European Union (EU) was the fourth largest source of Zambia's imports accounting for 10.3 percent in January 2012. Within the EU, the United Kingdom was the major source of Zambia's imports accounting for 26.0 percent in January 2012 while Finland was second with 18.0 percent. Other notable markets were Germany, Sweden and Ireland.

INDUSTRIAL PRODUCTION

Overall Performance in the First Three Quarters of 2011

Data for the first three quarters of 2011 show that Zambia's industrial output increased by 5.9 percent in 2011 compared to output produced during the same period in 2010. This is according to the 2011 3rd Quarter Index of Industrial Production (IIP) which covers the Mining and quarrying; Manufacturing; and Electricity industries.

The 5.9 percent growth in the production index is on account of strong growth in manufacturing and electricity. Output for manufacturing and electricity grew by 10.2 percent and 11.4 percent respectively, in the first three quarters of 2011.

Electricity Index	133.6	144.0	7.8	160.5	11.4

Source: CSO; 2010 and 2011 Index of Industrial Production Statistics

The 5.9 percent growth in the Index of Industrial Production in 2011 is however 3.4 percentage points lower than that

recorded in 2010. The low growth is mainly on account of reduced production in the mining sector.

SECTOR PERFORMANCE

Performance of the Mining and Quarrying Industry

Production in the Mining and Quarrying industry grew by 1.8 percent in the first three quarters of 2011. The lower growth in the mining and quarrying index is a

result of a decline in the Non-ferrous ore sub-industry, which declined by 1.1 percent in 2011. This is due to a decline in the production of copper.

Performance of the Mining and Quarrying Industry in the first three Quarters, 2011

Period		Average Index Q1_Q3 2009	Average Index Q1_Q3 2010	Growth 2010/2009	Average Index Q1_Q3 2011	Growth 2011/2010

	Coal	43.9	0.0	(100.0)	0.0	-
	Non-ferrous Ore	229.6	265.4	15.6	262.5	(1.1)
	Stone Quarrying	302.2	318.4	5.4	341.9	7.4

Source: CSO; 2010 and 2011 Index of Industrial Production Statistics

Coal and Stone Quarrying Production

Coal mining continues to record no production. However, production at the only coal mine is now expected to resume by the end of the first quarter of 2012.

The Stone quarrying sub industry recorded a growth of 7.4 percent in the first three quarters of 2011.

Copper and Cobalt Production by the Core Mines

Copper production declined from 562,912 metric tonnes in the first three quarters of 2010 to 552,124 metric tonnes in the first three quarters of 2011, representing a decline of 1.9 percent.

Production of cobalt, on the other hand increased from 1,789 metric tonnes in the first three quarters of 2010 to 1909 metric tonnes in the first three quarters of 2011, an increase of 6.7 percent.

Copper and Cobalt Production by core mines, first three quarters 2009, 2010 and 2011 (Metric tonnes)

Copper	0.85	489,781	562,912	14.9	552,124	(1.9)
Cobalt	0.15	1222	1,789	46.4	1909	6.7

Source: CSO; 2010 and 2011 Index of Industrial Production Statistics

Performance of the Manufacturing Industry

Production in the manufacturing industry grew by 10.2 percent in the first three quarters of 2011 compared to 6.6 percent in the same period of 2010. The high growth is mainly attributed to the

Food, Beverages & Tobacco; Non-metallic mineral products; Paper & Paper Products; and the fabricated metal products sub-industries.

Performance of manufacturing industry in the first three quarters of 2011

Source: CSO: 2010 and 2011 Index of Industrial Production Statistics

The Food beverages and tobacco sub-industry grew by 9.0 percent in the first three quarters of 2011 compared to 6.5 percent in the same period 2010. This is on account of increased production in grain milling and beverages.

The Non-metallic mineral products sub-industry grew by 23.1 percent in the first three quarters of 2011 compared to a growth of 12.1 percent recorded in the first three quarters of 2010, an increase of 11 percentage points, mainly on account of increased production of cement and lime.

The Paper and paper products sub-industry grew by 17.5 percent in the first three quarters of 2011, compared to a

growth of 25.4 percent recorded in the same period in 2010.

The fabricated metal products sub-industry grew by 18.9 percent compared to a growth of 15.0 recorded in the first three quarters of 2010. In this sub-industry, output grew on account of increased production of door and window frames, bolts and nuts.

Other sub-industries, except Textiles, Clothing and Leather industries and the Basic Metal Products, also recorded positive growth rates. The Textiles, Clothing and Leather industries and the Basic Metal Products recorded declines in output of 58.1 percent and 1.4 percent, respectively, in the period under review.

Performance of the Electricity Industry

Electricity generation grew by 11.4 percent in the first three quarters of 2011 compared to the same period in 2010. In the first three quarters of 2011, a total of

9,319,000 KWh of electricity was generated compared to 8,368,859 KWh generated during the same period in 2010.

Production of electricity in KWh, 2010 – 2011
