December, 2009

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Ms. Efreda Chulu  
Director of Census and Statistics

# INFLATION

## ***Inflation declines by 1.6 Percentage points!***

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), declined by 1.6 percentage points from 11.5 percent in November, 2009 to 9.9 percent in December, 2009. The decline of 1.6 percentage points in the annual inflation rate in December, 2009 was as a result of decreases in some food prices.

In addition, price increases recorded between November and December, 2009 are lower compared to price increases between November and December, 2008.

### ***Changes in annual inflation rates for CPI Main Groups***

Between December 2008 and December 2009, the annual inflation rates declined for food, beverages and tobacco; furniture and household goods; transport and communication; and recreation and

education. The annual inflation rate increased for clothing and footwear; rent, fuel and lighting; medical care; and other goods and services.

### ***The annual food inflation rate***

The annual food inflation rate was recorded at 8.0 percent in December 2009. This is a decline from 11.1 percent in November 2009. Contributing most to the decline in food inflation were decreases in the cost of meat, dried kapenta, preserved meat, sugar, other fresh vegetables and fresh fruits.

However, increases were recorded in the cost of mealie meal, maize grain, cereal products, cooking oil, tomatoes, rape (vegetable), dried beans, sweet potatoes, salt and other processed food products.

### ***Non-food inflation***

The annual non-food inflation rate stood at 11.8 percent in December 2009. This is

a decline from 11.9 percent in November 2009.

# LIVING CONDITIONS MONITORING SURVEY

## *National poverty trends 1996 – 2006*

The Central statistical office revised the poverty lines of the Living conditions Monitoring surveys of 1996, 1998, 2004 and 2006. This is in tune with changes in international methodologies and standards on the measurement of poverty. These standards are periodically updated.

The 2006 poverty results show that poverty has declined from 68.1 percent in 1996 to 59.3 percent in 2006. This means that 59.3 percent of the population in Zambia was poor in 2006, or about 7 million persons out of a population of 11.7 million. The results

further show that extreme poverty has declined from 44.5 percent in 1996 to 36.5 percent in 2006, meaning that 36.5 percent of the population in Zambia was extremely poor in 2006.

The depth of poverty (P1 – average distance from the poverty line) has also declined from 33.6 in 1996 to 28.5 in 2006. This means that the poor are becoming less poorer. The severity of poverty (P2) has declined from 20.4 percent in 1996 to 17.0 percent in 2006. This means that the incidence of severe poverty is on the decline.

**Total Poverty trends 1996-2006**

Source: CSO- 2006 Poverty report

Analysis by rural/urban shows that in rural areas, the levels of poverty has declined from 84.2 percent in 1996 to 76.8 percent in 2006. The figures above mean that in 2006, 76.8 percent of the populations residing in rural areas are poor. This translates to about 5.9 million persons being poor in rural areas in 2006 out of the total population of about 7.6 million persons in rural areas.

In the Urban areas, the levels of poverty declined from 40.5 percent in 1996 to 26.7 percent in 2006. This means that about 1.1 million persons in urban areas were poor in 2006.

The results also show that at national level extreme poverty declined from 44.5

percent in 1996 to 36.5 percent in 2006. The results further show that at residence (rural/urban) level extreme poverty declined from 61.3% in 1996 to 50.7% in 2006, in rural area. This means that about 50.7% of the total population (or about 3.9 million persons) in the rural areas were extremely poor in 2006. In urban extreme poverty declined from 15.8% in 1996 to 10.2 percent in 2006 in urban areas. This means that only 10.2 % of the entire population residing in urban areas was extremely poor in 2006. This translates to only 418,000 persons being extremely poor in urban areas out of a total population of about 4.1 million persons.

## Layman and Statistics

1. **Raw materials:** Raw materials are goods that are not subjected to any form of transformation in their production. Residuals, wastes and scrap are also included under this category.
2. **Intermediate products:** Intermediate products are those that undergo a further degree of value addition. Included in this category are parts (as far as they are separately identified as such in the Harmonized System).
3. **Consumer goods:** These are goods at the last stage of production and are ready for consumption or use. Also included under this category is food and live animals (except pure-bred breeding animals).
4. **Capital goods:** This category of goods includes livestock (pure-bred breeding live animals) and durable industrial production goods such as machinery
5. **General Trade System:** According to this system, imports include all those goods from abroad that have entered the economic territory of Zambia. Exports include goods produced, grown or manufactured in Zambia directly exported (domestic exports) and exports of originally imported goods in free circulation (re-exports). Exports of goods which were originally imported in bond and which never entered Zambia's customs territory are not included. Goods simply in transit through Zambia are deemed not to enter the Zambian custom's territory
