September, 2011

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

September Inflation Slightly Increases to 8.8 percent.

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), slightly increased to 8.8 percent in September 2011 from 8.3 percent in

August 2011. The increase is attributed to increases in some food and non-food prices.

INTERNATIONAL MERCHANDISE TRADE

August 2011 records Trade Surplus

Zambia recorded a trade surplus valued at K795.0 billion in August 2011, representing a nominal increase of 80.4 percent from K440.7 billion recorded in July 2011. This means that the country exported more in August 2011 than it imported, in the same month, in nominal terms.

Since January 2011, the country has had monthly trade surpluses with the highest valued at K1,484.3 billion recorded in January 2011 and the lowest in July 2011, valued at K440.7 billion.

Zambia's Major Export Destinations by Commodity in August 2011

Zambia's major export destination in August 2011 was Switzerland, which accounted for 38.8 percent. The major export products were Cathodes & Sections of Cathodes of refined Copper accounting for 77.1 percent.

China was the second major destination of Zambia's exports accounting for 16.7 percent. The major export product was Copper blister (62.8 percent).

South Africa was the third major destination of Zambia's exports accounting for 8.3 percent. The main export products were Cathodes & Sections of Cathodes of refined Copper which contributed 34.7 percent to the country's share of exports.

United Kingdom was the fourth major destination of Zambia's exports accounting for 5.5 percent. The major export products were Cathodes and sections of cathodes of refined copper (86.5 percent).

The Democratic Republic of Congo was the fifth major export destination of Zambia's exports accounting for 5.2 percent. The major export product was Sulphur, sublimed or precipitated, which accounted for 14.3 percent.

These five countries collectively accounted for 74.6 percent of Zambia's total export earnings in August 2011.

Export Market Shares by Regional Groupings, August and July 2011

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's total exports, accounting for 34.1 percent in August 2011. Within SADC, South Africa was the dominant market in August and July 2011 with 46.4 and 41.9 percent, respectively. Congo (DR) was second in both August and July 2011 with 24.4 and 25.1 percent, respectively. Other notable markets were Zimbabwe, Mauritius and Malawi.

Asia was the second largest market for Zambia's total exports, accounting for 17.8 percent in August 2011. Within Asia, China was the dominant market in both

August and July 2011 with 94.0 and 93.9 percent, respectively. The United Arab Emirates was the second dominant market in August 2011 with 2.6 percent while Singapore was second in July 2011 with 3.5 percent. Other notable markets were India, Hong Kong and Thailand.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest market for Zambia's total exports accounting for 11.1 percent in August 2011. Within COMESA, Congo (DR) was the dominant market with 46.9 percent in August 2011 and 42.9 percent in July 2011. Zimbabwe was the second dominant market in

August 2011 with 18.3 percent and 18.5 percent in July 2011. Other notable markets were Mauritius, Malawi and Kenya.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 6.8 percent in August

2011. Within the EU, the United Kingdom was the dominant market with 80.7 and 52.8 percent in August and July 2011, respectively. Luxembourg was the second dominant market in August 2011 with 8.1 percent and 20.5 percent in July 2011. Other notable markets were Slovenia, Netherlands and Germany.

Import Market Shares by Regional Groupings, August and July 2011

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 50.2 percent in August 2011. Within SADC, South Africa was the major source of Zambia's imports with 74.4 percent in August 2011 and 59.1 percent in July 2011. Congo (DR) was the second major source of Zambia's imports with 17.3 and 34.8 percent in August and July 2011, respectively. Other notable markets were Zimbabwe, Namibia, Botswana and Tanzania.

Asia was the second largest source of Zambia's imports accounting for 35.1 percent in August 2011. Within Asia, China was the major source of Zambia's imports in both August and July 2011 with 35.8 and 39.8 percent, respectively. Kuwait was the second major source of Zambia's exports with 30.9 percent in August, while India was second in July

with 30.0 percent. Other notable markets were the United Arab Emirates and Japan.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest source of Zambia's imports accounting for 11.9 percent in August 2011. Within COMESA, Congo (DR) was the major source of Zambia's imports in both August and July 2011 with 72.7 and 85.6 percent, respectively. Zimbabwe was the second major source of Zambia's imports with 12.3 and 5.0 percent in August and July 2011. Other notable markets were Kenya, Malawi and Egypt.

The European Union (EU) was the fourth largest source of Zambia's imports accounting for 9.3 percent in August 2011. Within the EU, the United Kingdom was the major source of Zambia's imports

accounting for 34.9 and 24.4 percent in August and July 2011, respectively. Finland was second with 15.3 percent in

August and 21.1 percent in July 2011. Other notable markets were the Netherlands, Germany and Belgium.

(R) Revised figures

STATUS ON THE NEW CONSUMER PRICE INDEX (CPI):

The Central Statistical Office is in the process of launching the New CPI by the end of this year. The office has since revised the methodology for computing the Consumer Price Index (CPI). The New CPI includes the following key features: -

- a) A revised basket of goods and services from 357 products to 438 products
- b) New computer system for data entry, processing and analysis
- c) A new classification system of 12 Divisions in accordance with international guidelines Classification of Individual Consumption by Purpose (COICOP)
- d) New expenditure weights from the 2002/2003 Living Conditions Monitoring Survey (LCMS)
- e) Additional number of districts and outlets
- f) A new index reference period from 1994 to 2009
- g) New CPI uses Geometric Mean as opposed to Arithmetic Mean for calculating elementary level indices
- h) A new formula for calculating higher level indices
- i) Production of Provincial Indices

The office has been compiling the new CPI since January 2010 for the purpose of testing the new Software.

Following recommendations from stakeholders, three sub-committees were formed to deal with specific issues regarding the new CPI. The following are the sub-committees:

- a) Methodology Sub-committee to review and validate the new CPI methodology and software
- b) Policy sub-committee to deal with policy implications of the New CPI.
- c) Sensitisation sub-committee to look into issues of sensitising the general public

The methodology sub-committee, comprising members from Bank of Zambia; Ministry of Finance and National Planning; University of Zambia; and the Zambia Institute of Policy Analysis and Research, reviewed and validated the New CPI methodology and software. In addition, an international consultant from the International Labour Organisation (ILO) came to review and validate the new CPI methodology and software.

The results from the New CPI will not be directly comparable with the Current CPI because of differences in methodologies.

The New Consumer Price Index (CPI) is expected to be launched by the end of this year (2011).

A comparison of the New and Current CPI is shown below:

	Current CPI	New CPI
Districts	45	48
Weights	1993/1994	2002/2003
Outlets	2115	2710
Products	357	438
Base Period (Index reference period)	1994	2009
Classification	8 Divisions	12 Divisions (COICOP)
Methodology	Arithmetic mean	Geometric mean
Methodology	Base price reference period	Previous month price
Compilation level	Met Low, Met High Non-Met	Provincial CPI's
Software for Data Entry, Processing and Reporting	Dbase IV, DOS based	Microsoft Access With Visual Basic for Applications

2010 CENSUS OF POPULATION AND HOUSING:

Final Population Summary Results Expected before the end of the Year!

The 2010 Census of Population and Housing final population summary results are expected to be released before the end of the year. This follows the successful completion of data capture from over 3 million questionnaires used in the 2010 Census of Population and Housing. The information on the questionnaires was captured using Intelligent Character Recognition (ICR) and Optical Mark Reading (OMR) technology. Data capture was done over a period of 5 months from April-August 2011.

Currently, CSO is running programmes to edit the data, check for consistency and quality. Final population results will be ready for dissemination before the end of the year 2011. The Population figures will be made available at National, Provincial, District, Constituency and Ward levels. The final population figures will be disaggregated by sex and rural-urban residence for National, Provincial and District levels. Final inter-censal population Growth Rates and population Densities at different levels are also expected to be released together with the final population figures.

CSO has also developed tabulation and analysis plans which await stakeholder input. Soon a stakeholders' consultative meeting will be held to review the tabulation and analysis plans. Some of the topics of tabulation and analysis will include Demographic and Social Characteristics of the Zambian Population; Literacy and Education; Economic Characteristics of Individuals and Households; Agricultural Activities of Households; Fertility and Mortality levels (Patterns and Trends); Migration levels (Pattern and Trends); Disability; Orphanhood; Household Characteristics; Composition and Distribution; and Housing Characteristics among others. This information will be made available in Descriptive Tabulation Reports, Analytical Reports and Summaries. These publications will be made available in both hard copy and electronic formats sometime mid next year, 2012.

The CSO also intends to make and produce a Projections Report on the Zambian Population and Demographic Characteristics for the period 2011-2025. This report is expected at the end of the year 2012 and will be made available to users in both hard copy and electronic formats.

CSO TO CONDUCT 2011 ECONOMIC CENSUS

The Central Statistical Office will next month commence the 2011 Economic Census which will provide key economic performance indicators and give a detailed profile of the Zambian economy.

The Economic Census is the full measurement of all entrepreneurial units located within the geographical boundaries of the country, involved in any economic activity. It is the total process of collecting, compiling, evaluating, analysing, interpreting and disseminating economic data pertaining to 2010 from business establishments in the country. It will be the primary source of information about business activities in the Zambian economy. It will ultimately form the basis for all economic surveys in the country.

The listing phase of the economic census was conducted during 2007/2008. The 2011 Economic Census will focus on the enumeration of the listed business establishments.

The primary objective of the first phase of the Economic Census was to set up a comprehensive register of establishments. The register of establishments is the main source of business 'demography', as it keeps track of business creation and closures, structural changes in the economy

brought about by operations such as the change in the line of business, mergers, takeovers, break ups, and so on.

The register of establishments which was developed during the first phase of the Economic Census will be updated to create a current and comprehensive frame of establishments. This register will then be used as a sampling frame for carrying out industry-specific establishments surveys.

The 2011 Economic Census will be implemented in all districts of Zambia. It will provide comprehensive data at provincial level as well as representative industry-level estimates.

The data collected will, among other things, be used to benchmark and rebase the Gross Domestic Product and the Index of Industrial Production. It will also aid in measuring the true extent of both foreign and domestic investment in Zambia. The results of the 2011 Economic Census are expected to be disseminated by the end of 2012.

With the launch of the Sixth National Development Plan (2011-2016), the 2011 Economic Census will be used as the baseline tool for the monitoring and evaluation of Government's economic policies.
