May, 2016

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

Inflation decreases to 21.3 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for May 2016 decreased to 21.3 percent compared to 21.8 percent recorded in April, 2016. This means that on average, prices increased by 21.3 percent between May 2015 and May 2016. The decrease in the annual rate of inflation was mainly attributed to decreases in the prices of food items e.g. maize grain, bread, buns, etc.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Annual Inflation Rate May 2015 to May 2016

Annual Food and Non-Food Inflation Rates

The annual food inflation rate for May 2016 was recorded at 25.8 percent compared to 26.5 percent recorded in April, 2016. This indicates a decrease of 0.7 percentage points. The decrease in food inflation was mainly attributed to decreases in the inflation of maize grain, bun, imported bread flour and frozen fish. The annual non-food inflation rate for May 2016 decreased to 16.5 percent

compared to 16.7 percent recorded in April, 2016. This indicates a decrease of 0.2 percentage points.

The decrease in non-food inflation was mainly attributed to decreases in inflation of imported chitenge materials, ladies bra and Airfare.

Zambia's Major Export Destinations by Commodity in April 2016

The major export destination in April 2016 was Switzerland, which accounted for 34.3 percent of the total export earnings. The major export product to Switzerland was Cathodes & Sections of Cathodes of refined Copper accounting for 44.0 percent.

China was the second main destination of Zambia's exports accounting for 22.0 percent of the total export earnings. The major export product to China was Copper blisters accounting for 76.9 percent.

Singapore was the third main export destination accounting for 12.3 percent of the total export earnings. The major export product to Singapore was Other mineral substances, nes, accounting for 57.8 percent.

Congo DR was the fourth main export destination accounting for 6.8 percent of the total export earnings. The major export product to Congo DR was Sulphuric acid; oleum in bulk accounting for 9.5 percent.

The fifth main export destination was South Africa which accounted for 6.5 percent of the total export earnings. The major export product to South Africa was Other Articles of cobalt, nes, accounting for 25.2 percent.

These five countries collectively accounted for 81.8 percent of Zambia's total export earnings in April 2016.

Export Market Shares by Selected Regional Groupings and major trading partners, April and March 2016

Asia was the largest market for Zambia's total exports, accounting for 44.3 percent in April 2016. Within Asia, China was the dominant market, accounting for 49.6 percent. Other notable markets in Asia were Singapore, United Arab Emirates, India and Japan.

Switzerland was the second largest export destination for Zambia's total exports in March 2016, accounting for 34.3 percent.

The Dual SADC/COMESA grouping was the third largest market for Zambia's total exports accounting for 10.8 percent in April 2016. Within this grouping, Congo DR was the dominant market with 62.9 percent. Other notable markets in this grouping were Malawi, Zimbabwe and Swaziland.

The SADC exclusive grouping was the fourth largest destination accounting for 7.4 percent of Zambia's total exports in April 2016. Within this grouping, South Africa was

the dominant market with 88.0 percent. Other notable markets were Tanzania, Botswana, Lesotho and Mozambique.

The European Union (EU) was the fifth largest market for Zambia's total exports accounting for 1.8 percent in April 2016. Within the EU, United Kingdom was the dominant market with 86.0 percent. Other notable markets were Netherlands, Italy Germany and Belgium.

The COMESA exclusive grouping was the sixth largest market for Zambia's total exports accounting for 1.2 percent in April 2016. Within this grouping, Kenya was the dominant market accounting for 67.9 percent. Other notable markets in this grouping were Rwanda, Burundi and Uganda.

The rest of the world accounted for the remaining 0.2 percent in April 2016.

Import Market Shares by Selected Regional Groupings and major trading partners, April and March 2016

The SADC Exclusive grouping was the major source of Zambia's imports, accounting for 41.3 percent in April 2016. Within this grouping, South Africa was the dominant market with 84.1 percent. Other notable markets were Tanzania, Namibia, Mozambique and Botswana.

Asia was the second main source of Zambia's imports accounting for 24.4 percent in April 2016. Within this grouping, China was the major source of Zambia's imports accounting for 35.0 percent. Other notable markets were Kuwait, India, United Arab Emirates and Japan.

DUAL - SADC & COMESA was the third main source of Zambia's imports accounting for 22.1 percent in April 2016. Within this regional grouping Congo DR was the main source of

Zambia's imports with 64.1 percent. Other notable markets were Mauritius, Zimbabwe, Malawi and Swaziland.

The European Union was the fourth largest source of Zambia's imports accounting for 6.6 percent. Within this grouping, the United Kingdom was the main source of Zambia's imports with 27.1 percent. Other notable markets were Germany, Finland, Ireland and Sweden.

The COMESA exclusive grouping was the fifth largest source of Zambia's imports accounting for 1.1 percent in April 2016. Within this grouping, Kenya was the dominant market with 67.8 percent. Other notable markets were Egypt, Uganda, Burundi and Ethiopia.

7,528,091 ZAMBIANS ELIGIBLE TO VOTE IN FORTHCOMING NATIONAL REFERENDUM!

Background

On Tuesday 5th January 2016, His Excellency the President Mr. Edgar Chagwa Lungu signed the new Constitution adopted by Parliament into Law. Further, the Government of the Republic of Zambia (GRZ) has decided to subject the Bill of Rights to a national referendum to be held alongside the 2016 Presidential, Parliamentary, Mayoral and Local Government Elections. The Referendum Act No. 5 of 2015 under subsection 2 provides as follows; “Any question put to a referendum under Article 79 of the Constitution shall be voted on by not less than fifty percent of persons entitled to be registered as voters for the purposes of Presidential and Parliamentary elections”. Thus the Central Statistical Office (CSO) has provided projected estimates of the number of eligible voters in the forthcoming referendum to the Electoral Commission of Zambia (ECZ), which is the Referendum Commission.

In determining the appropriate methodology for estimating the number of eligible voters (or the persons entitled to be registered as voters), the CSO considered four options:

- i. Use of the most recent census figures, which in this case would be the number of eligible voters estimated in the 2010 Census of Population and Housing*
- ii. Use of population projections of eligible voters, based on the 2010 Census of Population and Housing*
- iii. Use of a national sample census, with sufficient sample size to provide estimates of eligible voters for each of the 150 constituencies*
- iv. Conduct of a complete census of population, covering the entire country population*

Due to the challenging fiscal situation and limited time before the National Referendum in August 2016, the CSO has used option *ii* above to generate projections of the Number of Eligible Voters in the 2016 National Referendum. These estimates have been extracted from information contained in the National Population Projections Report covering the period 2011 to 2035.

Methodology for the Zambia Population Projections 2011-2035

The 2011-2035 population projections were made using the total de jure population counted in the 2010 census, and projected forward from 30th June 2010 (mid-year). The use of the de jure population is consistent with past practice and provides a more accurate representation of total populations at different geographic levels. The cohort component method, considered a “Gold Standard” for generating population projections was used in generating the projections at national, provincial and for rural and urban areas. The method involved the use of population data on births, deaths and migration from the 2010 census. A rigorous process of data analysis and evaluation of past demographic trends and patterns, including extensive consultation of literature was made to arrive at assumptions on future population prospects for the projection period, 2011-2035. Further, as a quality control assurance measure, the CSO worked closely with technical staff from the US Census Bureau in developing the assumptions and the final population projections. Strict adherence to sound methodology and international best practice were followed at all times. A detailed population projections report covering the period 2011-2035 was published and disseminated to the public by the CSO in July 2013.

Estimation of Eligible Voters in 2016

From the projected total population of **15,933,883**, an estimated total of **7,528,091** Zambians shall be aged **18 years or older by 30th June 2016**, thus qualifying to be registered as voters and eligible to vote in the forthcoming referendum in August, 2016. The distribution of eligible voters by sex and province is provided in the table below.

Projected Total Number of ELIGIBLE VOTERS [Population aged 18 years or older] and Projected TOTAL POPULATION as at Mid-year, By Sex, ZAMBIA 2016

National Food Balance for Zambia for the 2015/2016 Agricultural Marketing Season Based on the 2014/2015 MAL/CSO Crop Forecasting Survey and MAL/CSO/Private Sector Utilization Estimates (Metric Tonnes)

**National Food Balance for Zambia for the 2016/2017 Agricultural Marketing Season
Based on the 2015/2016 MoA/CSO Crop Forecasting Survey and MoA/CSO/Private Sector Utilization Estimates (Metric Tonnes)**

	Maize	Paddy rice	Wheat (Preliminary)	Sorghum & Millet	Sweet and Irish potatoes	Cassava flour	Total (maize equivalent)
A. Availability:	667,524	112	156,555	1,971	0	12	823,844
(i) Opening stocks (1st May 2016) ^{1/}	2,873,052	26,675	-	44,080	256,310	854,393	823,844
(ii) Total production (2015/16) ^{2/}	3,540,577	26,787	156,555	46,051	256,310	854,405	
Total availability							
B. Requirements:	1,588,831	62,453	379,500	41,383	243,495	779,972	2,864,746
(i) Staple food requirements:	500,000	0	0	0	0	0	500,000
Human consumption ^{3/}							
Strategic Reserve Stocks (net) ^{4/}	257,912	0	0	0	0	0	257,912
(ii) Industrial requirements:	115,500	0	0	0	0	0	115,500
Stockfeed ^{5/}	100,000	3,000	0	2,464	0	0	105,306
Breweries ^{6/}	143,653	1,334	15,500	2,204	12,816	42,720	206,073
Grain retained for other uses ^{7/}	200,000						200,000
(iii) Losses ^{8/}		66,787	395,000	46,051	256,310	822,692	
(iv) Structural cross-border trade ^{9/}	2,905,896						4,249,537
Total requirements							
C. Surplus/deficit (A-B) ^{10/}	634,681	-40,000		0	0	31,713	625,255
D. Potential Commercial exports ^{11/}	-634,681	40,000	0	0	0	0	0
E. Food aid import requirements ^{12/}	0	0	0	0	0	0	0

Notes:

^{1/} Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2016

^{2/} Production estimates by MoA/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

^{3/} Human staple food consumption represents 70% (1,470 kCal/person/day, CSO) of total diet (2,100 kCal/person/day, National Food and Nutrition Commission), for the national population of 14.58 million people (based on CSO Census projections with 2016 and 2017 average population used). The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

^{4/} National strategic requirements expected to be carried over into the next season by FRA.(this amount of 500,000 Mt includes equivalent quantity that is already budgeted for)

^{5/} Estimated requirements by major stock feed producers.

^{6/} Estimated requirements by industrial breweries.

^{7/} Estimated retention of grain for other uses by smallholders.

^{8/} Post-harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

^{9/} Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2015/16 marketing season. It does not include Formal trade.

^{10/} Expected surpluses' or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

^{11/} Commercial imports/exports represent expected regional and international trade by the private sector. been harvested

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested

^{12/} Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
