The Monthly

Central Statistical Office

Volume 159

Website: www.zamstats.gov.zm

July, 2016

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

Inflation decreases to 20.2 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for July 2016 decreased to 20.2 percent from 21.0 percent recorded in June, 2016. This means that on average, prices increased by 20.2 percent between July 2015 and July 2016. The decrease in the annual rate of inflation was mainly attributed to decreases in

the prices of vegetables, fruits, purchase of motor vehicles and airfare.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Annual Food and Non-Food Inflation Rates

The annual food inflation rate for July 2016 was recorded at 24.8 percent compared to 25.3 percent recorded in June, 2016. This indicates a decrease of 0.5 percentage points. The decrease in food inflation was mainly attributed to decreases in the prices of dried Bream, dried Kapenta (Mpulungu), Oranges, Bananas, Vegetable rape, Tomatoes and Onions.

The annual non-food inflation rate for July 2016 decreased to 15.3 percent from 16.5 percent recorded in June, 2016. This indicates a decrease of 1.2 percentage points.

The decrease in non-food inflation was mainly attributed to decreases in prices of charcoal, motor vehicles, and airfare.

INTERNATIONAL MERCHANDIZE TRADE

Trade Deficit increases in June 2016

Zambia recorded a trade deficit in June 2016 valued at K1,905.9 Million from K79.2 Million recorded in May 2016. This means that the country imported more in June 2016 than it exported in nominal terms.

This increase in the trade deficit is attributed to the significant increase in imports by 41.2 percent from K5,494.3 Million in May to K7,755.6 Million in June which outweighed the increase in exports by 8.0 percent from K5,415.1 Million in May to K5,849.7 Million in June.

Performance of Exports (Traditional and Non-Traditional Exports (NTEs), January to June 2016*

Between January and June 2016, Traditional Exports accounted for a period average share of 71.7 percent of total exports, valued at K24,275.4 Million while Non Traditional Exports accounted for a period average share of 28.3 percent, valued at K9,578.6 Million.

In June 2016, the total value of Metal exports was K4,171.0 Million from K4,025.3 Million recorded in May 2016,

representing an increase of 3.6 percent. The overall contribution of Metals and their products to the total export earnings in June and May 2016 averaged 72.8 percent. Non Traditional exports increased by 20.8 percent from K1,389.7 Million in May to K1,678.7 Million in June 2016. The share of NTEs recorded an average of 27.2 percent in revenue earnings between June and May 2016.

Zambia's Exports of Copper by Volume and corresponding prices at the London Metal Exchange (LME), January to June 2016

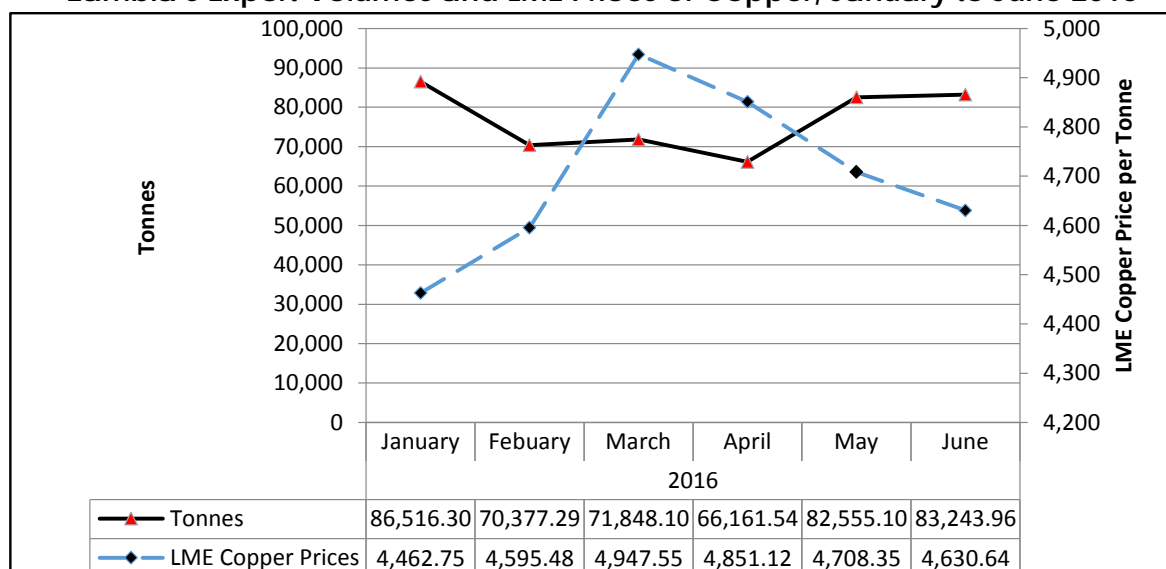

Between January and June 2016, the volume of Copper exhibited a fluctuating trend with the highest volume of 86,516.3 metric tonnes recorded in January 2016 and the lowest volume of 66,161.5 metric tonnes recorded in April 2016.

On the other hand, the corresponding price of Copper on the London Metal Exchange registered a steady increase between January and March 2016 from

USD 4,462.75 per metric tonne to USD 4,947.55 per metric tonne; before declining to USD 4,630.64 per metric tonne in June 2016.

Since this product accounts for the largest weight/ proportion of Traditional Exports, any change in the volume and price/value has a direct bearing on the performance of Traditional Exports.

Zambia's Export Volumes and LME Prices of Copper, January to June 2016

Zambia's Major Export Destinations by Commodity in June 2016

The major export destination in June 2016 was Switzerland, which accounted for 40.8 percent of the total export earnings. The major export products to Switzerland were Cathodes and Sections of Cathodes of refined Copper accounting for 54.8 percent.

China was the second major destination of Zambia's exports accounting for 18.6 percent of the total export earnings. The major export product to China was Copper blister accounting for 69.9 percent.

South Africa was the third major export destination accounting for 7.4 percent of the total export earnings. The major export products were Bullion semi-manufactured forms accounting for 52.3 percent.

United Arab Emirates was the fourth major export destination accounting for 6.1 percent of the total export earnings. The major export products were Telephones for cellular networks or for other wireless networks accounting for 98.8 percent.

The fifth major export destination was United Kingdom which accounted for 5.9 percent of the total export earnings. The major export products were Other unrefined copper accounting for 33.0 percent.

These five countries collectively accounted for 78.8 percent of Zambia's total export earnings in June 2016.

Export Market Shares by selected Regional Groupings, June and May 2016

Switzerland was the largest export destination for Zambia during the month of June 2016, accounting for 40.8 percent of Zambia's total exports.

Asia was the second largest market for Zambia's total exports, accounting for 32.1 percent in June 2016. Within Asia, China dominated the export market, accounting for 58.0 percent. Other notable markets in Asia were United Arab Emirates (19.0 percent), Singapore (14.0 percent), Hong Kong (5.4 percent) and Japan (2.8 percent).

The Dual SADC/COMESA grouping was the third largest market for Zambia's total exports accounting for 10.5 percent in June 2016. Within this grouping, Congo DR was the dominant market with 50.1 percent. Other notable markets in this grouping were Malawi (28.2 percent),

Zimbabwe (21.3 percent), Swaziland (0.2 percent) and Mauritius (0.1 percent).

The SADC exclusive grouping was the fourth major destination accounting for 8.2 percent of Zambia's total exports, in June 2016. Within this grouping, South Africa was the dominant market with 89.7 percent. Other notable markets were Tanzania (4.8 percent), Botswana (3.1 percent), Namibia (1.2 percent) and Mozambique (1.2 percent).

The European Union (EU) was the fifth largest market for Zambia's total exports accounting for 6.3 percent in June 2016. Within the EU, United Kingdom was the dominant market with 92.6 percent. Other notable markets were Belgium (2.6 percent), Netherlands (1.9 percent), Germany (1.1 percent), and Italy (0.8 percent).

The COMESA exclusive grouping was the sixth largest market for Zambia's total exports accounting for 1.5 percent in June 2016. Within this grouping, Kenya was the dominant market with 41.4 percent. Other notable markets in this

grouping were Rwanda (33.8 percent), Burundi (18.7 percent), Ethiopia (3.1 percent) and Uganda (3.1 percent).

The rest of the world accounted for the remaining 0.5 percent in June 2016.

Zambia's Major Import Sources by Commodity in June 2016

The major source of imports in June 2016 was South Africa, accounting for 25.2 percent. The major import products were Telephones for cellular networks or for other wireless networks contributing 13.6 percent.

The second main source of Zambia's imports was Turkey which accounted for 23.4 percent. The major import products were Machinery for milling or working cereals or dried vegetables accounting for 99.6 percent.

Congo DR was the third main source of Zambia's imports accounting for 8.5 percent. The major import product was Other copper concentrate which accounted for 34.8 percent.

Other sources of Zambia's imports were Kuwait and China which collectively accounted for 14.0 percent of Zambia's Imports.

Import Market Shares by Selected Regional Groupings and major trading partners, June and May 2016

Asia was the major source of Zambia's imports accounting for 45.4 percent in June 2016. Within this grouping, Turkey was major source of Zambia's imports accounting 51.5 percent. Other notable markets were Kuwait (18.6 percent), China (12.2 percent), India (5.0 percent) and United Arab Emirates (3.8 percent).

The SADC Exclusive grouping was the second major source of Zambia's imports, accounting for 30.4 percent in June 2016. Within this grouping, South Africa was the dominant market with 83.1 percent. Other notable markets were Tanzania (11.6 percent), Namibia (3.6 percent), Mozambique (1.2 percent) and Botswana (0.4 percent).

DUAL - SADC & COMESA was the third major source of Zambia's imports accounting for 12.9 percent in June 2016. Within this regional grouping Congo DR was the main source of Zambia's imports with 66.3 percent. Other notable markets were Mauritius (26.7 percent), Zimbabwe (5.6 percent), Malawi (0.7 percent) and Swaziland (0.7 percent).

The European Union was the fourth largest source of Zambia's imports accounting for 7.9 percent. Within this grouping, the United Kingdom was the main source of Zambia's imports with 29.8 percent. Other notable markets were Finland (15.1 percent), Sweden (11.7 percent), Germany (8.8 percent) and Netherlands (6.8 percent).

The COMESA exclusive grouping was the fifth largest source for Zambia's imports accounting for 0.6 percent in June 2016.

Within this grouping, Kenya was the dominant market with 71.1 percent. Other notable markets were Egypt (17.5 percent) and Uganda (11.3 percent).

Zambia Goes Online On E-GDDS

The African Development Bank (AfDB) and the International Monetary Fund (IMF) have collaborated to provide an Open Data Platform (ODP) for African countries and regional organizations. This modern data publishing platform allows National Statistical Offices, Central Banks, Ministries of Finance, and other official agencies to open their data to a range of users. The Open Data Platform for Africa has been made available to African Countries under the statistical capacity building program of the African Development Bank (AfDB). The Open Data Portal is at the core of the Enhanced General Data Dissemination System (e-GDDS).

The e-GDDS is a system that aims to encourage member countries to improve data quality; provide a framework for evaluating needs for data improvement and setting priorities in this respect; and guide member countries in the dissemination to the public of comprehensive, timely, accessible and reliable economic, financial and socio-demographic statistics.

The public can have access to a range of data available online. The data categories available online are;

- National Accounts
- Consumer Price Index
- Merchandise trade
- Production Index
- Labour Market
- Socio – demographic Indicators

Visitors to the site can retrieve data in a number of useful formats:

1. Datasets allow for presentation (and download) of data in time series format
2. Dashboards provide a visual representation of data with charts, graphs, and other dynamic images.
3. Machine-readable downloads (in SDMX format) permits machine-to-machine dissemination and processing.

The initial focus of work on the ODP is publishing data that illuminate the economic and financial performance and health of country's economy. Over time, agencies will develop the tools to expand the range of data they make available to the public, national institutions, and international agencies.

AS A VISITOR TO THE OPEN DATA PLATFORM (ODP) YOU HAVE ACCESS:

- To browse and view datasets that are marked public.
- To browse or view a dataset shared to you directly by a dataset owner or contributor.
- To perform other basic functions such as search and download.

This document guides you through the Open Data Platform and describes the step-by-step process to use the different functions that you, as a visitor, can perform.

TO CREATE A NEW ODP ACCOUNT:

1. Visit the **ODP Website** (nso.zambia.opendataforafrica.org) in your Web browser. The **Login Page** will be loaded.
2. Click **Sign up**. Enter the details in the [Sign Up page](#) .
3. Click the checkbox ***Send me e-mail updates and notifications***, if you want to receive regular updates and notifications about the ODP.
4. By signing up, you agree to the [Terms of Use](#)..
5. Click **Sign Up**.
6. You will receive a [verification e-mail](#) with a verification link and a verification code to your registered e-mail address.
7. Click on the **verification link** or [enter the verification code](#) and click **Ok** to complete the registration process.
8. You will receive a [confirmation e-mail](#) to your registered e-mail address once registration is completed.

For more details contact: The e-GDDs National Coordinator; SMudenda@zamstats.gov.zm

7,528,091 ZAMBIANS ELIGIBLE TO VOTE IN FORTHCOMING NATIONAL REFERENDUM!

Background

On Tuesday 5th January 2016, His Excellency the President Mr. Edgar Chagwa Lungu signed the new Constitution adopted by Parliament into Law. Further, the Government of the Republic of Zambia (GRZ) has decided to subject the Bill of Rights to a national referendum to be held alongside the 2016 Presidential, Parliamentary, Mayoral and Local Government Elections. The Referendum Act No. 5 of 2015 under subsection 2 provides as follows; “Any question put to a referendum under Article 79 of the Constitution shall be voted on by not less than fifty percent of persons entitled to be registered as voters for the purposes of Presidential and Parliamentary elections”. Thus the Central Statistical Office (CSO) provided projected estimates of the number of eligible voters in the forthcoming referendum to the Electoral Commission of Zambia (ECZ), stakeholders in the electoral process and the general public at large.

In determining the appropriate methodology for estimating the number of eligible voters the CSO considered four options:

- i. Use of the most recent census figures, which in this case would be the number of eligible voters estimated in the 2010 Census of Population and Housing*
- ii. Use of population projections of eligible voters, based on the 2010 Census of Population and Housing*
- iii. Use of a national sample census, with sufficient sample size to provide estimates of eligible voters for each of the 150 constituencies*
- iv. Conduct of a complete census of population, covering the entire country population*

Due to the challenging fiscal situation currently prevailing in government and the limited time before the National Referendum in August 2016, option ii above was recommended, as the only viable alternative for estimating the number of eligible voters, in the 2016 National Referendum.

Methodology for the Zambia Population Projections 2011-2035

The 2011-2035 population projections were made using the total de jure population counted in the 2010 census, and projected forward from 30th June 2010 (mid-year). The use of the de jure population is consistent with past practice and provides a more accurate representation of total populations at different geographic levels. The cohort component method, considered a “Gold Standard” for generating population projections was used in generating the projections at national, provincial and for rural and urban areas. The method involved the use of population data on births, deaths and migration from the 2010 census. A rigorous process of data analysis and evaluation of past demographic trends and patterns, including extensive consultation of literature was made to arrive at assumptions on future population prospects for the projection period, 2011-2035. Further, as a quality control assurance measure, the CSO worked closely with technical staff from the US Census Bureau in developing the assumptions and the final population projections. Strict adherence to sound methodology and international best practice were followed at all times. A detailed population projections report covering the period 2011-2035 was published and disseminated to the public by the CSO in July 2013.

Estimation of Eligible Voters in 2016

From the projected total population of **15,933,883**, an estimated total of **7,528,091** Zambians shall be aged **18 years or older by 30th June 2016**, thus qualifying to be registered as voters and eligible to vote in the forthcoming referendum in August, 2016. The distribution of eligible voters by sex and province is provided in the table below.

Projected Total Number of ELIGIBLE VOTERS [Population aged 18 years or older] and Projected TOTAL POPULATION as at Mid-year, By Sex, ZAMBIA 2016

(iv) Structural cross-border trade 9/	2,905,896						4,249,537
Total requirements							
C. Surplus/deficit (A-B) 10/	634,681	-40,000		0	0	31,713	625,255
D. Potential Commercial exports 11/	-634,681	40,000	0	0	0	0	0
E. Food aid import requirements 12/	0	0	0	0	0	0	0

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2016

2/ Production estimates by MoA/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470 kCal/person/day, CSO) of total diet (2,100 kCal/person/day, National Food and Nutrition Commission), for the national population of 14.58 million people (based on CSO Census projections with 2016 and 2017 average population used). The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA.(this amount of 500,000 Mt includes equivalent quantity that is already budgeted for)

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post-harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2015/16 marketing season. It does not include Formal trade.

10/ Expected surpluses' or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

11/ Commercial imports/exports represent expected regional and international trade by the private sector. been harvested
For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
