January, 2015

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

Inflation decreases to 7.7 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for January 2015 was recorded at 7.7 percent compared to 7.9 percent recorded in December, 2014. This means that on average, prices increased by 7.7 percent between January 2014 and January 2015.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

INTERNATIONAL MERCHANDIZE TRADE

December 2014 records Trade Deficit

Zambia recorded a trade deficit valued at K81.9 Million in December 2014 from a trade surplus of K68.3 Million recorded in November 2014. This means that the

country imported more in December 2014 than it exported in nominal terms.

The highest trade surplus valued at K 295.4 Million was recorded in January 2014.

Exports by Major Product Categories, December and November, 2014

Zambia's major export products in December 2014 were from the intermediate goods category (*mainly comprising copper cathodes and sections of refined copper*) accounting for 87.8 percent. Other exports were from the Consumer goods, Capital goods and Raw materials, which collectively

accounted for 12.2 percent of total exports in December 2014. This implies that between December and November 2014, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, which on average accounted for 84.1percent of the total exports.

Zambia's Top 25 Non-Traditional Exports (NTEs), December and November, 2014

Zambia's major Non-Traditional Exports (NTEs) for the month of December 2014, were Sulphuric acid which accounted for 8.9 percent. Raw cane sugar was the second largest NTEs in December 2014, accounting for 5.2 percent.

Other notable NTEs, in December 2014 were Semi-manufactured gold (incl. gold plated with platinum) non-monetary (5.2 percent), Other waste and scrap of precious metals (4.9 percent) and Electrical energy (4.4 percent).

Zambia's Major Export Destinations by Commodity in December, 2014

The major export destination in December 2014 was Switzerland, which accounted for 53.5 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 52.5 percent.

China was the second major destination of Zambia's exports accounting for 15.2 percent. The major export product to China was Copper blister (68.7 percent).

The third major export destination was Congo DR accounting for 7.2 percent. The major export product to Congo DR was Sulphuric acid accounting for 23.2 percent.

Singapore was the fourth major export destination accounting for 6.9 percent. The major export products to Singapore were Cathodes & Sections of Cathodes of refined Copper (97.0 percent).

South Africa was the fifth major export destination accounting for 4.3 percent. The major export product to South Africa was semi-manufactured gold (incl. gold plated with platinum) non-monetary accounting for 22.8 percent.

These five countries collectively accounted for 87.1 percent of Zambia's total export earnings in December 2014.

Export Market Shares by Regional Groupings, December and November, 2014

Asia was the largest market for Zambia's total exports, accounting for 24.9 percent in December 2014. Within Asia, China dominated the export market, accounting for 61.1 percent. Other notable markets in Asia were Singapore,

Hong Kong, United Arab Emirates and South Korea.

Southern African Development Community (SADC) regional grouping was the second market for Zambia's total

exports, accounting for 16.1 percent in December 2014. Within SADC, Congo DR was the dominant market with 44.9 percent. Other notable markets in SADC were South Africa, Zimbabwe, Botswana and Malawi.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 10.6 percent in December 2014. Within COMESA, Congo DR was the dominant market with 68.2

percent. Other notable markets in COMESA were Zimbabwe, Kenya Malawi and Swaziland.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 2.2 percent in December 2014. Within the EU, Luxembourg was the dominant market with 68.2 percent. Other notable markets were Germany, United Kingdom, Denmark and Netherlands.

Zambia's Major Import Sources by Commodity in December, 2014

The major source of imports in December 2014 was South Africa, accounting for 32.5 percent. The major import product from South Africa was urea, contributing 4.9 percent.

The second main source of Zambia's imports was Congo DR which accounted for 19.6 percent. The major import products from Congo DR were Copper ores and concentrates, which accounted for 81.4 percent.

Kenya was the third main source of Zambia's imports accounting for 9.4 percent. The major import products from Kenya were Gas oils, accounting for 52.3 percent.

Other sources of Zambia's imports were China and India, which collectively accounted for 11.8 percent of Zambia's Imports.

LAYMAN & STATISTICS

Domestic Exports: These are goods originating from the exporting countries.

Re-exports: This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

Trade Surplus: this is a situation where a country is exporting more than it is importing in value terms.

Trade Deficit: It is a situation where a country is importing more than it is exporting in value terms.

SITC: Stands for Standard International Trade Classification. It is a trade statistical nomenclature mainly used in trade statistical analysis.

Total requirements	2,534,026	62,484	295,000	44,950	210,392	777,630	3,717,432
C. Surplus/deficit (A-B) ^{10/}	453,995	-15,000	146,839	0	0	336,953	896,677
D. Potential Commercial exports ^{11/}	-453,995	15,000	-146,839	0	0	0	0
E. Food aid import requirements ^{12/}	0	0	0	0	0	0	0

Notes:

^{1/} Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

^{2/} Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

^{3/} Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

^{4/} National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

^{5/} Estimated requirements by major stock feed producers.

^{6/} Estimated requirements by industrial breweries.

^{7/} Estimated retention of grain for other uses by smallholders.

^{8/} Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

^{9/} Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

^{10/} Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

^{11/} Commercial imports/exports represent expected regional and international trade by the private sector.

^{12/} Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
