March, 2014

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi
Director of Census and Statistics

Inside this Issue

- Inflation increases to 7.7 percent
- February 2014 records Trade Surplus
- Number of Housing Units on the Increase!
- CSO joins in celebrating the 2014 International Women's Day (IWD)
- Update on the status of the 2013/14 Crop Forecasting Survey
- Surveys/ Activities Being Undertaken
- Available Reports
- The Layman And Statistics

INFLATION

Inflation increases to 7.7 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for March 2014 was recorded at 7.7 percent compared to the 7.6 percent recorded in February 2014. This means that on average, prices increased by 7.7 percent between March 2013 and March 2014.

The overall index went up to 138.67 in March 2014 from 128.81 in March 2013.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Annual Inflation Rate, March 2013 to March 2014

Movements in Annual Inflation Rates for CPI Main Groups

Between March 2013 and March 2014, the annual rate of inflation increased for Food and Non - alcoholic beverages; Alcoholic beverages and Tobacco; Furnishings, household equipment and routine household maintenance; Transport; Recreation and Culture; and Restaurant and Hotel.

The annual rate of inflation decreased for Housing, water, electricity, gas and other fuels; Health; Communication and Education.

INTERNATIONAL MERCHANDIZE TRADE

February 2014 records Trade Surplus

Zambia recorded a trade surplus valued at K 59 Million in February 2014 from K296 Million recorded in January 2014. This means that the country exported more in February 2014 than it imported in nominal terms. Between the periods

January 2013 and February 2014, the highest trade surplus was recorded in April 2013 valued at K 364 Million and the lowest was recorded in November 2013, valued at K 4 Million.

Exports by Major Product Categories, February and January 2014

Zambia's major export products in February 2014 were from the intermediate goods category (mainly comprising copper cathodes and sections of refined copper) accounting for 84.5 percent. Other exports were from the Raw materials, Consumer goods, and Capital goods categories which collectively accounted for 15.5

percent of total exports in February 2014. This implies that between February and January 2014, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, accounting for an average of 83.7 percent of the total exports.

Zambia's Major Export Destinations by Commodity in February 2014

Zambia's major export destination in February 2014 was Switzerland, which accounted for 35.2 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 84.6 percent.

China was the second major destination of Zambia's exports accounting for 25.4 percent. The major export product to China was Cathodes & Sections of Cathodes of refined Copper (46.9 percent).

The third major export destination was Congo DR, accounting for 9.3 percent. The major export product to Congo DR was Sulphuric acid; oleum in bulk, accounting for 35.2 percent.

Singapore was the fourth major export destination accounting for 6.2 percent. The major export products to Singapore were precious or semi-precious stones, worked but not set, nes (79.1 percent).

South Africa was the fifth major export destination accounting for 6.0 percent. The major export product to South Africa was Semi-manufactured gold (incl. Gold plated with platinum), non-monetary which accounted for 21.8 percent.

These five countries collectively accounted for 82.1 percent of Zambia's total export earnings in February 2014.

2010 Census of Population and Housing

Number of Housing Units on the Increase!

The 2010 Census of Population and Housing collected information on households and housing characteristics which is necessary to facilitate evidence-based planning in the area of housing. The results indicate that there has been a continuous increase in the number of housing units since 1990. The number of housing units increased from 1,321,062 in 1990 to 2,660,989 in 2010, representing a percentage increase of 101.4 percent.

Rural/Urban analysis shows that there was a higher percentage increase in the housing units in urban areas at 118.4 percent than in rural areas at 91.5 percent.

Trends in the Total Number of Housing Units by Rural/Urban Residence, Zambia 1990, 2000 & 2010

Source: 2010 Census of Population and Housing

Of the 2,660,989 households, traditional housing units made up 44.2 percent while conventional housing units made up 20.2 percent. Improved traditional units constituted 21.6 percent, conventional flats constituted 9.2 percent and collective/institutional living quarters made up less than a percent (0.2 percent) of all housing units.

Lusaka Province had the highest percentage of conventional housing units at 45.6 percent while Western Province had the highest percentage of traditional housing units at 79.7 percent.

Table 3.2: Number and Percentage Distribution by Type of Housing Unit and Province, Zambia 2010

Gender Focus

CSO joins in celebrating the 2014 International Women's Day (IWD)

The International Women's Day (IWD) is celebrated on the 8th of March, every year under different themes. The IWD celebrates the social, political and economic achievements of women while focusing world attention on areas requiring further action. The theme for 2014 is "Inspiring Change; Celebrating 50 years of Women's excellence and achievements. This theme was adopted in consideration of Zambia's 50 years (Golden Jubilee) independence celebrations in 2014.

The Central Statistical Office (CSO) mandate is to collect, compile, analyse and disseminate statistics to government and other stakeholders. It is cognizant of governments and other organization's involvement in commemorating

important events such as the International Women's Day (IWD). CSO takes advantage of this day to disseminate various gender statistics particularly on women in Zambia.

The office resolved to celebrate this important event this year by rendering a community service to female in-mates in Chimbokaila prison through a donation of "day to day" necessities. This was made possible with the voluntary contributions collected from officers at CSO.

The event was conducted by the Gender Statistics Unit whose mandate includes collecting and compiling of gender statistics.

Update on the Status of the Crop Forecasting Survey

From around Mid-january this year, the Central Statistical Office has been working with the Ministry of Agriculture and Livestock in executing the Crop Forecasting Survey (CFS) for the 2013/2014 Agricultural season. Currently, officers from Central Statistical Office and Ministry of Agriculture

and Livestock are doing data entry for the CFS data. This activity is scheduled to end in the first week of April, to be followed immediately by data cleaning and analysis. The final results are expected to be disseminated by early May 2014.

E. Food aid import requirements	12/	0	0	0	0	0	0	0

Source: Crop Forecasting Survey (CFS) 2012/13

Notes:

- 1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2013.
- 2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.
- 3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.
- 4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).
- 5/ Estimated requirements by major stock feed producers.
- 6/ Estimated requirements by industrial breweries.
- 7/ Estimated retention of grain for other uses by smallholders.
- 8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.
- 9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.
- 10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D. For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.
- 11/ Commercial imports/exports represent expected regional and international trade by the private Sector.
- 12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
