## Central Statistical Office

Volume 119

Website: [www.zamstats.gov.zm](http://www.zamstats.gov.zm)

March, 2013

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi

- **February 2013 records Trade Surplus**
- **2010 Census of Population and Housing: Key Findings**
- **Selected Socio - Economic Indicators**

# INFLATION

## ***March Inflation slows down to 6.6 percent***

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), slows down by 0.3 percentage points, from 6.9 percent in February 2013 to 6.6 percent in March 2013. This means that on average,

prices increased by 6.6 percent between March 2012 and March 2013. The slowing down in annual inflation is attributed mainly to decreases in prices of some food and non-alcoholic beverage.

## ***Movements in Annual Inflation Rates for CPI Main Groups***

Between March 2012 and March 2013, the annual rate of inflation increased for Clothing and footwear; Housing, water, electricity, gas, and other fuels ; Furnishings, household equipment and routine household maintenance; Health; Communication; and Recreation and culture.

The annual rate of inflation decreased for Food and non-alcoholic beverages; Alcoholic Beverages and Tobacco; Education; Transport; Restaurant and hotel; and Miscellaneous goods and services.

### ***Contributions of different Items to Overall Inflation***

Of the total 6.6 percent annual inflation rate in March 2013, food products accounted for 3.1 percentage points, while non-food products

accounted for a total of 3.5 percentage points.

#### **Percentage Points Contributions of different items to Overall Inflation**

## ***The Annual Food and Non - food Inflation Rates***

The annual food inflation rate was recorded at 6.0 percent in March 2013 compared to 6.7 percent recorded in February 2013. This implies that there was a 0.7 percentage point

decrease in annual food inflation. The annual non-food inflation rate increased by 0.1 percentage points from 7.1 percent in February 2013 to 7.2 percent in March 2013.

## ***The Month on Month Food and Non-food Inflation Rate***

The month - on- month food inflation rate was recorded at 1.2 percent in March 2013 compared to -0.9 percent recorded in February 2013. This implies that the monthly food inflation rate increased by 2.1 percentage points.

Between February 2013 and March 2013, Non-food inflation rate decreased by 0.3 percentage points from 1.4 percent in February 2013 to 1.1 percent in March 2013.

### ***National Average Prices of Selected Products***

A comparison of retail prices between February 2013 and March 2013 shows that the national average price of a 25 kg bag of breakfast mealie meal increased by 2.5 percent from KR 54.41 to KR 55.77. The national average price of a 25 kg bag of roller mealie meal decreased by 1.6 percent from KR 43.20 to KR42.53.

Meanwhile, the national average price of a 20 litre tin of Maize grain increased by 5.0 percent from KR 25.81 to KR 27.10. The national average price of 1 kg Dried Kapenta (Mpulungu) increased by 9.3 percent from KR 76.92 to KR 84.09 and the average price of a 750ml of Cooking oil (imported) increased by 5.5 percent from KR 11.19 to KR 11.81.

## ***Explaining the Rate of Inflation***

When the price of a grocery item like bread goes up overnight, it affects your household spending. The result of price changes, that cause your household spending to rise or fall over time, is called inflation. The Central Statistical Office tracks inflation with a statistical tool called the Consumer Price Index (CPI).

The CPI is a series of numbers published on the last Thursday of every month by the CSO. Its numbers represent the price, at a set time, of a representative 'basket' of goods and services a typical household buys.

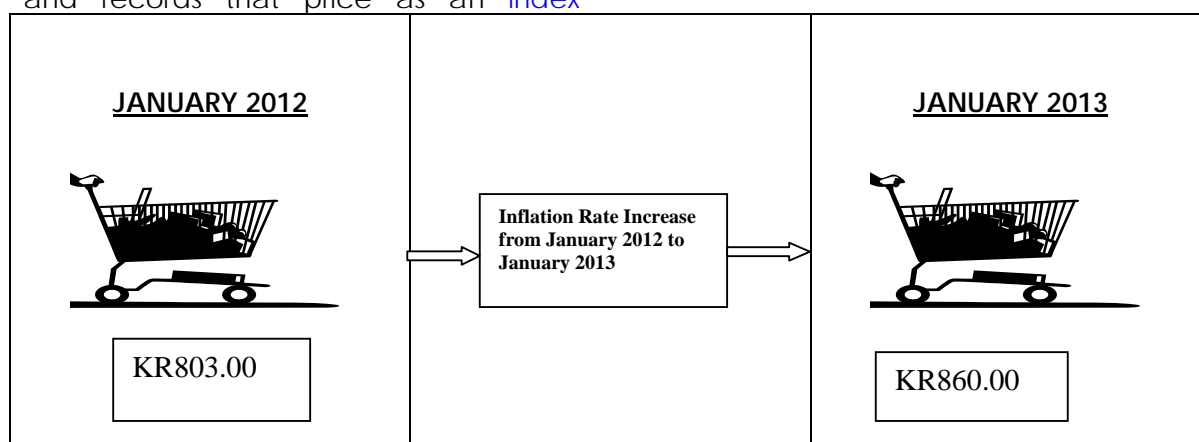

The CPI is often used as a general measure of inflation. It is not an exact record of individual households' spending, but it gives a good idea of how price increases affect household spending, and the change in money's 'buying power' because of inflation.

The CPI measures the price of a 'basket' of goods and services on a monthly basis and records that price as an **index**

**number**. When two CPI index numbers are compared, the change in the total cost of the basket from one point in time to another is shown. This comparison shows the size of the change in household spending for that time period as a percentage – often called the **inflation rate**.

The change shown by comparing index numbers is usually expressed as a percentage – for example, when the media reports that 'the inflation rate has increased by 7.1 percent in January 2013', this means that, compared to January 2012, consumer prices in the basket of goods have gone up by an average of 7.1 percent in January 2013.

To illustrate this, compare the effect of the inflation rate on the hypothetical price of a trolley of goods. In January 2012, the goods cost KR803.00. In January 2013, affected by the year's inflation rate of 7.1 percent, the same selection of goods cost KR860.00.

Within this basket of goods, it is possible that the prices of some of the products would have reduced, while the prices of some other products would have gone up. When the CSO reports that the inflation rate has increased by 7.1 percent, it means that on average, there has been a general rise in the prices of the basket of goods.

If, hypothetically, the same basket of goods now costs KR848.50 in February 2013, this will be compared to its cost in February 2012, which in our illustration is KR804.00. The annual rate of inflation for February 2013 is obtained by comparing the percentage increase between the cost in February 2012 and February 2013. This is 5.5 percent.

In comparing the two months in the media, there will be a big headline that says "February Inflation Drops" and it will be reported that the inflation rate has reduced from 7.1 percent in January 2013 to 5.5 percent in February 2013. Some people interpret this to mean the prices of goods have reduced. Consumer groups would cry foul and call CSO all sorts of names. Other consumers would question CSO's motive and credibility because they would not have seen any reduction in the prices at their local supermarket! This is a classic failure to interpret percentage changes.

The question is 'Has CSO reported a reduction in the price of the typical basket of goods that it monitors?' The simple answer to that question is definitely 'No'. The very fact that CSO reports the rate of *inflation* means the general level of prices has indeed gone up. What CSO has reported is a *reduction in the rate* of inflation. The rate at which the

prices of goods have increased in February (5.5 percent) is lower than the rate at which the prices increased in January (7.1 percent). But the bottom line is the price for the basket of goods did indeed increase.

The main thing to remember is that these percentages are calculated from actual values. If in December 2012, I bought a cob of maize at KR7.50, then in January the price goes up to KR8.00, the percentage increase in the price is 6.7 percent. If in February, the cob price increases to KR8.25, the percentage price increase is 3.1 percent. We would then say the *rate* of price increase reduced from 6.7 percent in January to 3.1 percent in February. This does not mean that the price of the maize cob reduced! The simple interpretation is that the price of the maize cob increased in February, but not as high as it did in January.

# INTERNATIONAL MERCHANDIZE TRADE

## **February 2013 records Trade Surplus**

Zambia recorded a trade surplus valued at K 133.2 Billion (KR133.2 Million) in February 2013 from K192.8 Billion (KR192.8 Million) recorded

in January 2013. This means that the country exported more in February 2013 than it imported, in nominal terms.

## ***Zambia's Major Export Destinations by Commodity in February 2013***

Zambia's major export destination in February 2013 was Switzerland, which accounted for 35.0 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 88.4 percent.

China was the second major destination of Zambia's exports accounting for 21.5 percent. The major export product to China was copper blister (61.0 percent).

South Africa was the third major export destination accounting for 14.5 percent. The main export products to South Africa were Wire of refined copper, accounting for 27.4 percent.

The fourth major export destination was Congo DR, accounting for 9.6 percent. The main export products to Congo DR were Sulphuric acid; oleum in bulk (21.4 percent).

The fifth major export destination was Malawi which accounted for 5.2 percent. The major export products to Malawi were Diesel for non dual purpose vehicles for either persons or goods up to 5 tonnes which accounted for 40.3 percent.

These five countries collectively accounted for 85.9 percent of Zambia's total export earnings in February 2013.

## Zambia's Major Import Sources by Commodity in February 2013

The major source of Zambia's imports in February 2013 was South Africa, accounting for 29.6 percent. The major import products from South Africa were Parts of machinery, contributing 5.1 percent.

The second main source of Zambia's imports was Congo (DR), which accounted for 14.2 percent. The major import products from Congo (DR) were Copper ores and concentrates, which accounted for 83.0 percent.

The third main source of Zambia's imports in February 2013 was China, accounting for 7.9 percent of the total value of imports. The major import products from China were Other-Tubes, pipes and hoses, rigid, of polymers of ethylene accounting for 10.8 percent.

Other sources of Zambia's imports were Kenya and United Kingdom, which collectively accounted for 11.9 percent of Zambia's Imports.

# 2010 Census of Population and Housing

## Key Findings

### Population Size, Growth and Distribution

#### Population Size

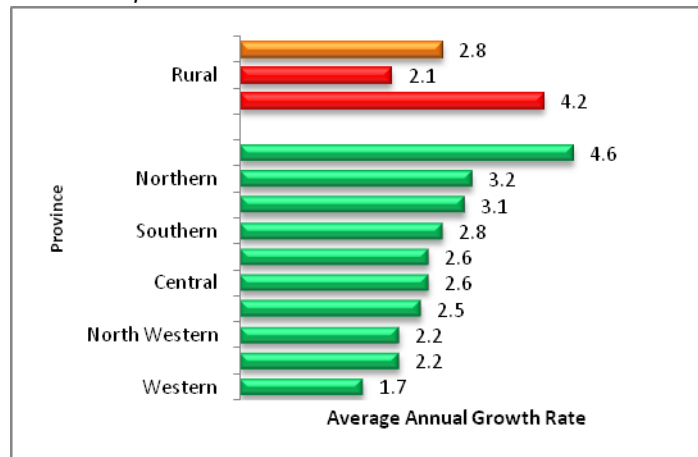

Zambia's population in 2010 was 13, 092, 666 an increase from 9,885,591 in 2000. The male population was 6, 454, 647 representing 49.3 Percent while that of females was 6,638, 019 representing 50.7 percent of the total population. The population residing in rural areas was 7,919,216, (60.5 percent) while the urban population was 5,173,450 (39.5 percent).

Population by Province, Sex and Rural/Urban, Zambia 2010					
Province	Population				
	Total	Male	Female	Rural	Urban
Zambia Total	13,092,666	6,454,647	6,638,019	7,919,216	5,173,450
Central	1,307,111	648,465	658,646	978,574	328,537
Copperbelt	1,972,317	981,887	990,430	376,861	1,595,456
Eastern	1,592,661	784,680	807,981	1,392,338	200,323
Luapula	991,927	488,589	503,338	797,407	194,520
Lusaka	2,191,225	1,082,998	1,108,227	336,318	1,854,907
Muchinga	711,657	349,872	361,785	590,575	121,082
Northern	1,105,824	546,851	558,973	903,208	202,616
North Western	727,044	358,141	368,903	563,061	163,983
Southern	1,589,926	779,659	810,267	1,197,751	392,175
Western	902,974	433,505	469,469	783,123	119,851

#### Population Growth

The population grew at a rate of 2.8 percent per annum between 2000 and 2010. The population in the rural and urban areas grew at 2.1 and 4.2 percent per annum, respectively.

#### Average Annual Rate of Population Growth by Province, Zambia 2000-2010

#### Population Density

Zambia had a population density of 17.4 persons per square kilometer in 2010, an increase from 13.1 persons per square kilometre in 2000.

The province with the highest density was Lusaka with 100.1 persons per square kilometer while the lowest population density was recorded in North Western at 5.8 persons per square kilometre.

#### Population Density by Province, Zambia 2010

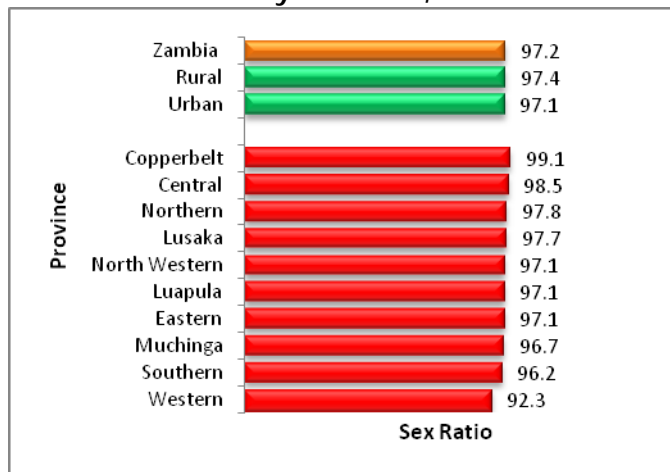

### Population Composition and Demographic Characteristics

#### Sex Ratio

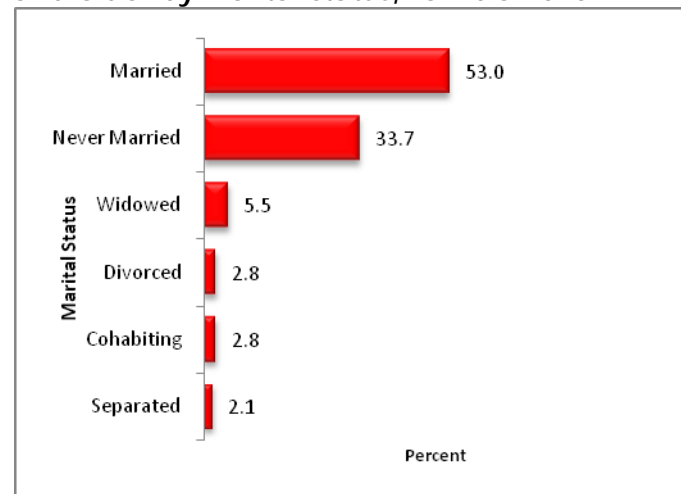

Overall, the composition of the population by sex showed that there were more females than males in Zambia with a sex ratio of 97.2. In rural areas the sex ratio was 97.4 while in urban areas it was 97.1. The sex ratio was below 100 for all the provinces.

## Overall Sex Ratio by Province, Zambia 2010

## Percentage Distribution of Population 15 years and older by Marital Status, Zambia 2010

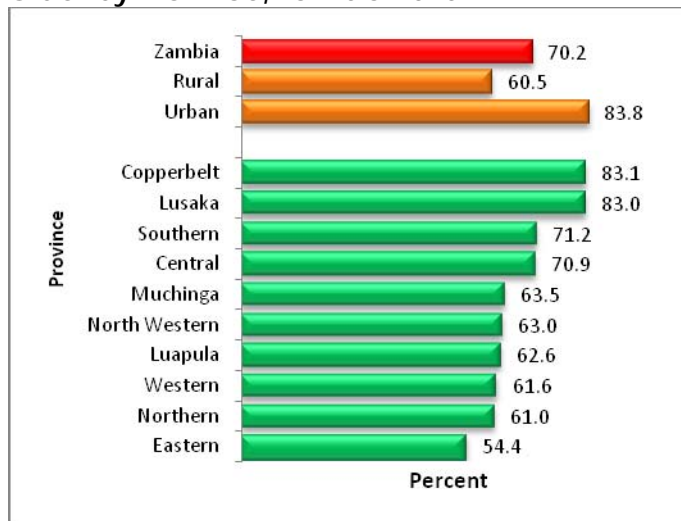

## Education Characteristics

### Literacy Rate

The national literacy rate was 70.2 percent in 2010, an increase from 55.2 percent in 2000. The literacy rate in rural areas was 60.5 percent compared to 83.8 percent in urban areas

### Literacy Rate for Persons Aged 5 Years and Older by Province, Zambia 2010

## Social Characteristics

### Marital Status

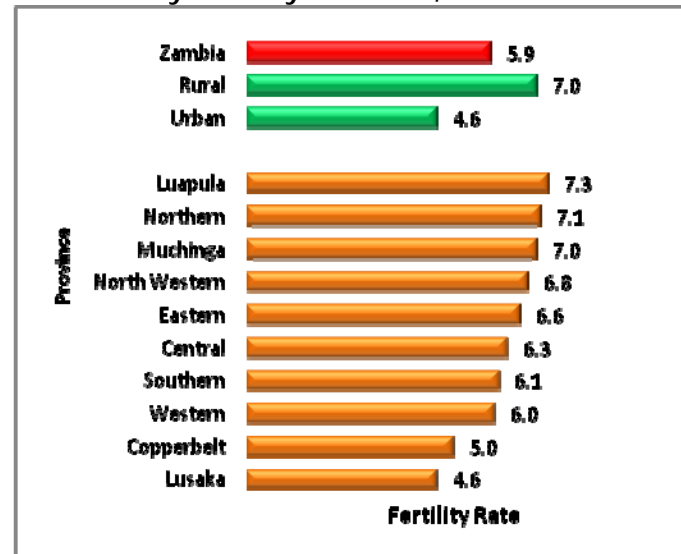

Of the population aged 15 years and older, 53.0 percent were married while 33.7 percent had never been married.

## Fertility Characteristics

### Total Fertility Rate (TFR)

In 2010, the TFR for Zambia was 5.9, implying that on average; each woman aged 15-49 years would approximately have 6 children in her entire reproductive period. In rural and urban areas, the Total Fertility Rate was at 7.0 and 4.6, respectively.

### Total Fertility Rate by Province, Zambia 2010

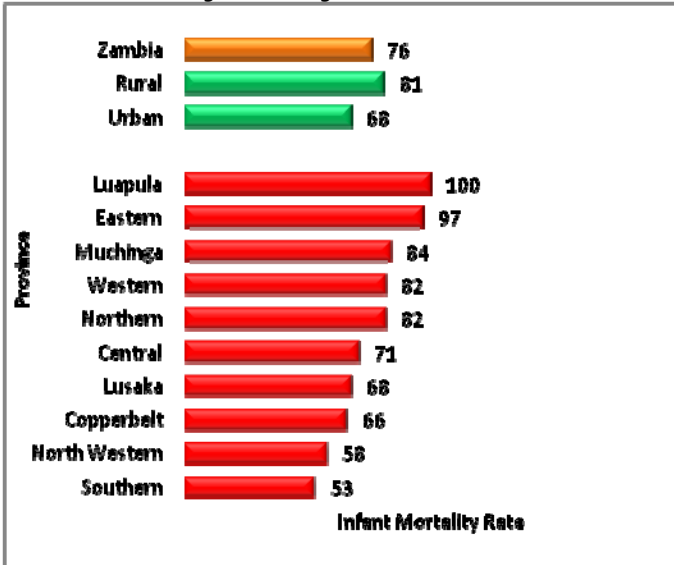

## Childhood Mortality Characteristics

### Infant Mortality Rate (IMR)

The IMR at national level was 76 deaths per 1,000 live births. Rural and urban areas had Infant Mortality Rates of 81 and 68 deaths per 1,000 live births, respectively.

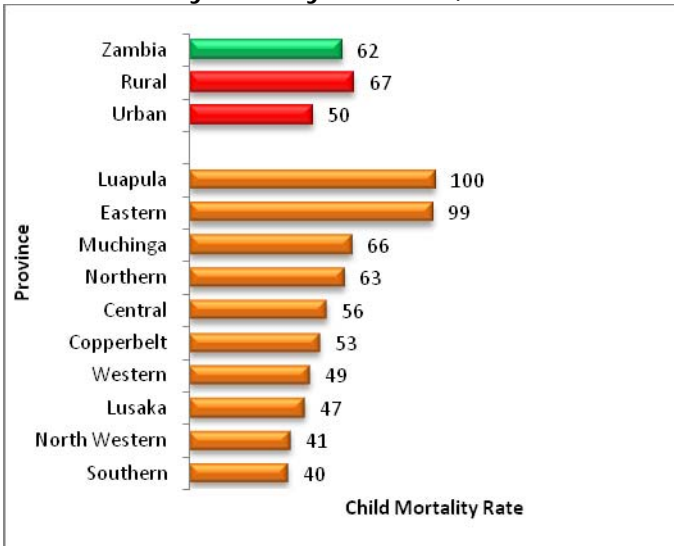

Infant Mortality Rate by Province, Zambia 2010

### Child Mortality Rate (CMR)

The CMR at national level was 62 deaths per 1,000 live births. Rural and urban areas had child mortality rates of 67 and 50 deaths per 1,000 live births, respectively.

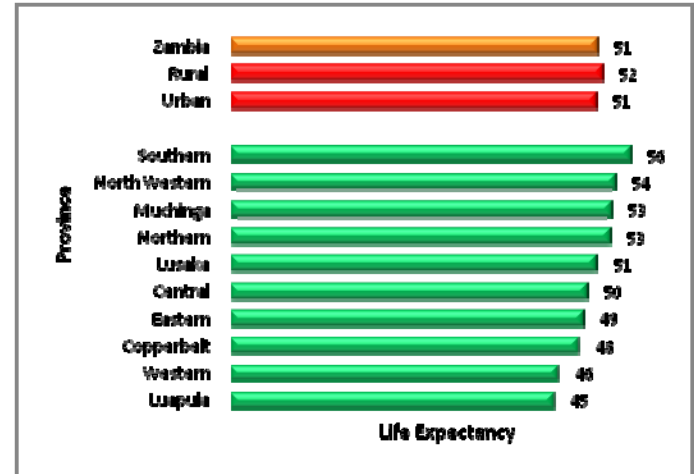

Child Mortality Rate by Province, Zambia 2010

## Life Expectancy at Birth

In 2010, the Life Expectancy at birth was 51 years. Rural and urban areas had Life expectancy at birth of 52 and 51 years, respectively.

Life Expectancy at Birth by Province, Zambia 2010

## Disability

At national level, 2.0 percent of the population was reported to be disabled. In rural and urban areas the percentage of the disabled population was 2.4 percent and 1.4 percent, respectively.

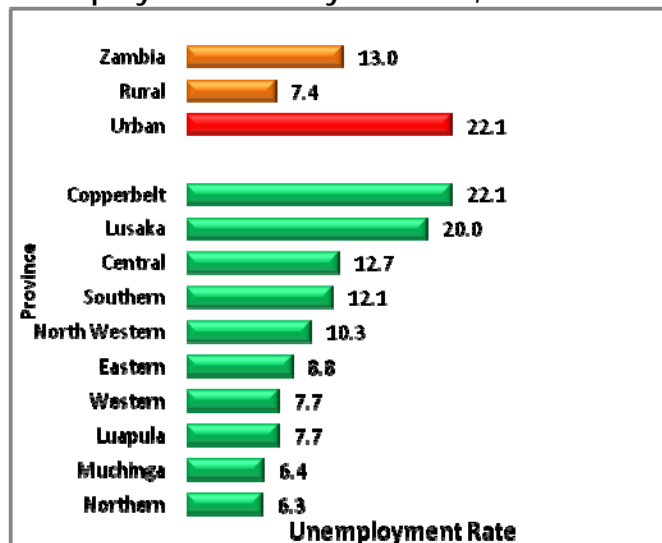

Percentage Distribution of Population with Disability by Province, Zambia 2010

## Unemployment Rate

Of the 4.3 million persons in the labour force, 554,202 (13.0 percent) were unemployed. Copperbelt Province had the highest unemployment rate at 22.1 percent while Northern Province had the lowest unemployment rate at 6.3 percent.

## Unemployment Rate by Province, Zambia 2010
