May, 2013

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Goodson Sinyenga

Inside this Issue

- **May Inflation goes up by 0.5 percent**
- **April 2013 records Trade Surplus**
- **The National Food Balance Sheet for the 2013/2014 Agricultural Marketing Season**
- **Maize Production expected to decrease**
- **Selected Socio - Economic Indicators**

INFLATION

May Inflation goes up by 0.5 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), increased by 0.5 percentage points, from 6.5 percent in April 2013 to 7.0 percent in May 2013. This means that on average, prices

increased by 7.0 percent between May 2012 and May 2013. The increase in annual inflation is attributed mainly to increases in prices of non-food and some food items.

Zambia's Major Export Destinations by Commodity in April 2013

Zambia's major export destination in April 2013 was Switzerland, which accounted for 39.0 percent. The major export products were Cathodes & Sections of Cathodes of refined Copper accounting for 92.7 percent.

China was the second major destination of Zambia's exports accounting for 20.8 percent. The major export product was Copper blister (54.3 percent).

South Africa was the third major export destination accounting for 13.4 percent. The main export products were Bars, rods and profiles of copper alloys, accounting for 47.8 percent.

The fourth major export destination was Congo DR, accounting for 6.5 percent. The main export product was Portland cement (26.7 percent).

The fifth major export destination was The United Arab Emirates which accounted for 6.1 percent. The major export products were Other Spirituous beverages, which accounted for 57.4 percent.

These five countries collectively accounted for 85.8 percent of Zambia's total export earnings in April 2013.

Import Market Shares by Regional Groupings, April and March 2013

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 55.6 percent in April 2013. Within SADC, South Africa was the major source of Zambia's imports with 53.4 percent. Other notable markets were Congo (DR), Zimbabwe, Tanzania and Namibia.

The Common Market for Eastern and Southern Africa (COMESA) regional grouping was the second largest source of Zambia's imports accounting for 30.8 percent in April 2013. Within COMESA, Congo DR was the main source of Zambia's imports, accounting for 74.1

percent. Other notable markets were Kenya, Zimbabwe, Swaziland and Egypt.

Asia was the third largest source of Zambia's imports accounting for 23.0 percent in April 2013. Within Asia, China was the main source of Zambia's imports with 40.1 percent. Other notable markets were Japan, India, Singapore and United Arab Emirates.

European Union (EU) was the fourth largest source of Zambia's imports, accounting for 10.1 percent. Within this grouping, the United Kingdom was the main source of Zambia's imports with 26.2 percent. Other notable markets were Germany, Sweden, Ireland and Belgium.

(R) Revised figures

AGRICULTURE STATISTICS

The National Food Balance Sheet for the 2013/2014 Agriculture Marketing Season

The 2012/2013 Crop Forecasting Survey (CFS) results show that the total national maize requirement for Zambia during the 2013/2014 agricultural marketing season is 2,534,026 metric tonnes.

The total maize available this season is made up of 2,532,800 metric tonnes that is expected to be produced during the 2012/2013 Agricultural Season and 455,221 metric tonnes carry-over stocks available sat 1st May 2013.

Zambia is therefore expected to have a maize surplus of 453,995 metric tonnes in the 2013/2014 Agricultural Marketing

Season. This outcome is partly as a result of the good rains that were experienced especially in the northern part of the country.

The country is also expected to have surpluses of cassava flour equivalent, and wheat of 336,953 and 146,839 metric tonnes, respectively. On the other hand, the country is expected to have a deficit of 15,000 metric tonnes of Paddy rice.

The total food surpluses (i.e. all cereals plus cassava and potatoes) when converted to maize meal equivalent is expected to be 896,677 metric tonnes.

National Food Balance Sheet for Zambia for the 2013/2014 Agricultural Marketing Season Based on the 2012/2013 MAL/CSO Crop Forecasting Survey and MAL/Private Sector Utilization Estimates (Metric Tonnes)

| | Maize | Paddy Rice | Wheat | Sorghum & Millet | Sweet and Irish potatoes | Cassava flour | Total (maize equivalent) |

| E. Food aid import requirements 12/ | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2013.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private Sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.

Maize Production expected to decrease, 2012/2013 CFS Results reveal!

The 2012/2013 Crop Forecasting Survey (CFS) results show that the production of Maize is expected to decrease by 11.2 percent from 2,852,687 metric tonnes (MT) during the 2011/2012 agricultural season to 2,532,800 metric tonnes during the 2012/2013 agricultural season.

The results also show that area planted to maize increased by 2.9 percent from 1,274,983 hectares to 1,312,402 hectares. Furthermore, area harvested to maize is expected to decrease by 7.1 percent from 1,074,658 hectares during the 2011/2012 agricultural season to 997,880 hectares during the 2012/2013 agricultural season.

The expected decrease in maize production in the 2012/2013 agricultural season could be attributed to the poor distribution of rains especially in Southern, Eastern, Lusaka and Central provinces. The outbreak of Army Worms is another factor which affected output.

The average yield of maize per hectare is also expected to decrease by 13.7 percent from 2.24 MT in 2011/2012 Agricultural season to 1.93 MT in the 2012/2013 agricultural season.

At provincial level, Western and Lusaka Provinces are expected to have an increase in maize production of 1.6 and 0.1 percent, respectively. The rest of the provinces are expected to have a lower maize production compared to the last

Agricultural Season (2011/2012). The largest reduction of 27.0 percent in estimated maize production is expected to be recorded in Luapula province.

Expected Maize Production for the 2012/2013 Agricultural Season

Source: CSO/MAL, Crop Forecasting Survey, 2011/2012 and 2012/2013 Agricultural Seasons

Of the total 2,532,800 metric tonnes of maize expected to be produced this Agricultural season, Eastern Province will account for 23 percent, followed by Central Province, which will account for 19 percent of the total expected

production, while Southern Province is expected to account for 18 percent.

Western Province will contribute the lowest proportion of 3 percent to the total forecast maize production.
